

# Kumamoto Aerospace Component Cluster

- This cluster consists of KUMABOU METAL Co.,Ltd. Co.,Ltd. Co.,Ltd. All cluster companies are based in Kumamoto Prefecture.
- The strong process are Processing.
- We have over machines and can process , Stainless steel, Aluminum.
- The two companies in the cluster have acquired JISQ9100.

Anodizing Line (Line name 「Venus」)

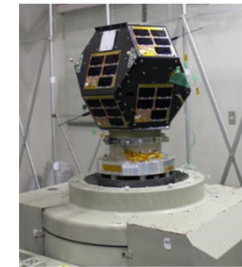

Acquired JISQ9100

Parts Coating

Artificial satellite

Flight equipment

A certain traceability of a product is possible by introduction of IOT.

Special Process : Anodizing Type II Class1, Class2  
Hard anodizing

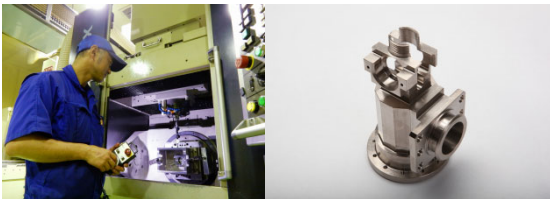

The effective size : 2,900 × 500 × 1,700mm (400kg)
